## Capital gains and losses and dividends

Long-term capital gain rate (longer than one year)			
	0% <sup>1</sup>	15% <sup>1</sup>	20% <sup>1</sup>
Single	\$0 – \$47,025	\$47,026 – \$518,900	\$518,901 +
Married filing jointly and surviving spouse	\$0 – \$94,050	\$94,051 – \$583,750	\$583,751 +
Head of household	\$0 – \$63,000	\$63,001 – \$551,350	\$551,351 +
Married filing separately	\$0 – \$47,025	\$47,026 – \$291,850	\$291,851 +
Trusts and estates	\$0 – \$3,150	\$3,151 – \$15,450	\$15,451 +

<sup>1</sup>Determine your capital gain bracket(s) by adding your net long-term capital gains and/or qualified dividends to your other taxable income net of deductions. Multiple tax rates may apply since rates are progressive.

For example, assume a joint filer has net taxable income of \$100,000 which includes \$20,000 in net long-term capital gain. The first \$14,050 of the gain falls within the 0% rate threshold of \$94,050 and will be taxed at 0%; while the remaining \$5,950 of long-term capital gain is above the \$94,050 threshold and will be taxed at 15%.

<b>Short-term capital gain rate (one year or less)</b>	Taxed at ordinary income tax rate.
<b>Dividends</b>	Qualified dividends are taxed at the long-term capital gain rates. Nonqualified dividends are taxed at ordinary income tax rates.

Higher rates apply to collectibles and unrecaptured §1250 gain. Consult your tax advisor about how they apply to your situation.

## Netting capital gains and losses

1. Net short-term gains and short-term losses.
2. Net long-term gains and long-term losses.
3. Net short-term against long-term.
4. Deduct up to \$3,000 of excess losses against ordinary income per year.
5. Carry over any remaining losses to future tax years
