## Life goals

The *Envision* process considers all of your target goals and what you would ideally like to achieve. Please help us understand your goals.

1. I would like to plan for retirement at age \_\_\_\_\_ (acceptable), but I would be willing to take action (such as saving more or reducing my retirement spending goal) if it would mean I could retire at age \_\_\_\_\_ (ideal).

Note: If you're already retired, check here and skip to question 3:

2. My spouse/partner will retire at the same time I do:  Yes  No  
If no, my spouse/partner would like to target retirement at age \_\_\_\_\_ (acceptable), but if he or she could retire at age \_\_\_\_\_ (ideal), we would like our plans to include that possibility.

3. We would like Wells Fargo Advisors to estimate our retirement spending needs as indicated below: (check one)

- We would like to plan for after-tax, annual retirement spending of \$ \_\_\_\_\_ (acceptable), but if we could increase our spending to \$ \_\_\_\_\_ (ideal) per year, we would like to consider that possibility.
- We would like you to estimate our retirement spending based on our current after-tax income and what is normally needed to maintain our lifestyle.

4. We would like to leave an estate worth at least \$ \_\_\_\_\_ (acceptable), but if we could increase that to \$ \_\_\_\_\_ (ideal) with minimal impact on our other goals, we would like to consider that possibility.

## Education goals

Please complete the following information for each individual member of the household for whom you wish to plan to fund education goals. ## Income needs

Please tell us which best describes your attitude toward income from the investment portfolio profiled in this report:

- Not expecting to need income from the portfolio for several years; investment strategy should emphasize growth.
- Interested in current income from the portfolio, but willing to accept a lower level of current income to have potential for long-term growth.
- Primary investment goal is income, but willing to accept less potential for long-term growth in order to seek more current income.

## Risk tolerance and avoidance

Within the *Envision* process, we assume you would prefer to avoid risk if possible. However, it may be necessary to accept your maximum risk tolerance to meet critical financial goals. Based on the table below, identify the following:
